

Cashmere Miller

Tasks that can be done in app/website

Name: My NextLvl

Tasks that the user will conduct on the application

The purpose of this app is to provide easier access to information and resources that will improve the transition from pediatric to adult healthcare/adulthood for adolescents' who are medically fragile.

Name of App/Website: My NextLvl

Store key personal data when registering account:

1. Allergy list
2. Diagnosis
3. Medications (I will create a list of medications to choose from in a drop-down menu and it will have a time-frame for each medication)
4. Insurance information
5. Emergency contact information
6. List of primary care physician & specialists

Set Reminders:

1. Refill medications
2. Make doctor appointments

Medical Conditions list that will have content and links to resources for their condition:

- Diabetes
- Asthma
- Seizures
- Gastrointestinal disorders
- Hyperthyroidism
- Hypothyroidism
- Sickle Cell Anemia
- Cystic Fibrosis
- Autism

Other conditions that will only have links to resources for their condition:

- cerebral palsy
- spina bifida
- orthopedic disorders
- scoliosis
- chronic lung conditions
- neurological disorders
- vision disorders (other than corrective lenses)

Cashmere Miller

Tasks that can be done in app/website

Name: My NextLvl

- immune disorders
- Urinary tract disorders
- Cleft Lip and palate
- hydrocephalus
- hearing conditions
- Down's Syndrome
- craniofacial disorders
- Cardiac Conditions

Access information & resources:

- A page with local medical clinics in DeKalb County and surrounding Atlanta areas (phone numbers listed should have the ability to touch link and it dials/calls directly from the link)
 - A list of local support groups (specific to medical condition and general) in DeKalb County and surrounding Atlanta areas
 - Educational resources and opportunities in DeKalb County and surrounding Atlanta areas
 - A page with brief information about their medical condition
 - A page with information and resources for general Nutrition Education (some conditions will have specific information)
 - Complete surveys (can I receive the survey results upon completion? I would prefer the results be directly sent to me))
- ✓ Should be able to be customized for various users and ages (12-21)
 - ✓ Should be accessible in English/Spanish (more if possible)
 - ✓ Should be available to various open-source operating systems (examples: Android/IOS)
 - ✓ Should be able to be updated with recent information and provide links to sites/web pages such as www.cdc.gov

Note: I changed the list of conditions that will have content verses those that will just have links. I have also replaced the insurance information page with a nutrition information page.
